HOW IT WORKS

Host your classroom in 3 simple steps

A frictionless workflow from instant room creation to interactive teaching.

01

Instant Room Setup

Click "New Meeting" and choose your role as Tutor. Your 4K WebRTC room is instantly provisioned with zero delay.

02

Share Meeting Link

Send the 1-click URL to your students. They can join immediately from browser on laptop, iPad, or mobile phone without downloading software.

03

Teach & Collaborate

Draw geometric shapes with ruler & compass, launch instant live quizzes, share your screen, or stream live to YouTube.

PLATFORM FEATURES

Engineered for seamless live instruction

Combines Google Meet simplicity with purpose-built mathematical tutoring superpowers.

Mediasoup SFU Protocol

Ultra-low 50ms latency video conferencing without expensive third-party per-minute cloud bills. Delivers crystal-clear feeds even on low bandwidth.

Geometry Instruments

Interactive Ruler with cm markings, 360° Protractor with angle display, Compass for circles, and Set Squares on an infinite collaborative canvas.

Real-Time Quizzes & Polls

Launch live MCQ questions directly in meeting. Students vote with 1 click, and results update live with animated percentage bars.

Local HD & YouTube Live

Record directly to your Mac or Windows PC in full 1080p, or stream your class live to your academy's YouTube channel via RTMP.

Companion Tablet Mode

Teach from your laptop webcam and link your iPad or graphics tablet as a silent pen drawing surface without audio echoes.

Tutor Moderation & Gates

Enforce mandatory camera rules, force-mute students, lower hands, and expel disruptive participants with complete host oversight.
